European Unfinished Engineered Flooring

Manufactured at our own European flooring factory to consistently high specifications. We offer a range of structural engineered oak flooring available in 5 widths (135, 160, 180, 210 and 240mm). With a micro bevelled edge and a 6mm wear limit in both premier and natural grades. Suitable for most types of fitting method including installation over under floor heating. All of these products come sanded and filled requiring only a minimum fine sand prior to the application of finish after installation. This gives customers maximum control over the final appearance.

Floor Finishes - Hardwax Oils

Osmo is the leading brand available today. It is extremely hard wearing, water resistant, stain resistant to DIN 68861/1C and almost odorless on application.

A 2.5ltr tin of polyx oil should cover 30m² with two coats.

We stock part of the colour range in both the Creativ and Woodwax Finish and are able to order others as requested. We also keep various sample pots so that you can try them out at your own convenience.

Underlay and Floor Protection

Underlay is a form of noise reduction for use with engineered floors. Most types are intended for use with floating floors only.

Foxtrot panels are made from 90% recycled material.

Heatflow underlay is designed for use over under floor heating.

Lecol slatted underlay is a unique system whereby you can bond a floor through the slats to incorporate a permanently fixed floor with the benefits of an underlay.
